CORE SKILLS

- ETL/ELT Pipeline Design
- AWS Data Platform
- dbt · Airflow · TWS(tivoli)
- PySpark · SQL · Python
- Data Modelling & Quality
- Infrastructure-as-Code
- CI/CD · GitLab · Docker
- Pipeline Monitoring
- CloudWatch
- FastAPI · React

AI & Developer Productivity

- Cursor
- ClaudeCode
- GitLab Duo
- Antigravity
- Prompt Engineering
- AI-Assisted Development

CERTIFICATIONS

[AWS Cloud Practitioner](#)

[AWS Developer – Associate](#)

[AWS AI Practitioner](#)

[Claude Code in Action](#)

EDUCATION

B.Tech – Computer Engineering

VIT Pune

2019 – 2023 · 8.69 CGPA

Higher Secondary

Govt. HSS, J&K · 91%

2017 – 2019

LANGUAGES

- English – Professional
- Hindi – Native

PROFESSIONAL PROFILE

Cloud Engineer with 3+ years building and operating production-grade AWS data platforms at Barclays. Specialist in reliable, scalable ETL pipelines, DBT transformations, and Airflow orchestration. Delivers end-to-end ownership: from architecting data models and monitoring pipeline health to driving cost optimisation and Infrastructure-as-Code practices. AWS triple-certified with a track record of 80% deployment effort reduction, and migrating 100M+ daily records from legacy systems to cloud with 55% pipeline performance optimization.

WORK EXPERIENCE

Senior Data Engineer – BA4 · **Barclays Technology Centre** *Mar 2025 – Present*

- ▶ Architected **AWS data pipelines** for the Credit Risk Data Warehouse, processing millions of records daily with strict reliability and SLA guarantees.
- ▶ Reduced manual deployment effort by 80% via **GitLab CI/CD** automating dbt-to-S3, EC2 releases, and product provisioning using lakeformation templates.
- ▶ Delivered POCs in **Airflow, Databricks & Apache Iceberg**, influencing enterprise-wide architecture decisions alongside CTO and platform teams.
- ▶ Strengthened data quality, lineage and pipeline trust across downstream risk analytics using DBT and data contract governance.
- ▶ Re-architected internal analytics tool from **Streamlit** → **FastAPI + React**, deployed on **EC2** with horizontal scaling and concurrent access - fully productionised.

Software Engineer – BA3 · **Barclays Technology Centre** *Jul 2023 – Mar 2025*

- ▶ Built DBT transformation models on AWS S3 data lakes producing curated datasets for risk scorecards and executive dashboards.
- ▶ Leveraged **AWS SageMaker** to generate synthetic datasets using PySpark mirroring production data on S3, enabling comprehensive stress testing and performance validation of DBT pipelines in cloud testing environments
- ▶ Productionised Python & **AWS Glue automation** scripts (date control, validation, static data loads) reducing manual intervention to near-zero.
- ▶ Governed data contracts with upstream/downstream teams, improving **data quality** and confidence in enterprise risk metrics.
- ▶ **Automated** daily batch pipelines via Tivoli Workload Scheduler (**TWS**) with strict SLA adherence and incident monitoring.

KEY PROJECTS

CRDW – Teradata Exit (Credit Risk Data Warehouse)

- ▶ Optimised **DBT** pipelines processing **100M+ records/day** - cut execution time by **55%** (45 → 20 min) through incremental models and query rewriting.
- ▶ Automated date controls using **AWS Glue & Lambda**; designed GitLab CI/CD enabling one-click deployments, cutting release effort by 65-70%.
- ▶ Built Golden Source SQL datasets powering risk models, regulatory reporting, and analytics across the organisation.

Streamlit → FastAPI + React (Internal Analytics Platform)

- ▶ Independently re-architected a bottlenecked Streamlit tool into a **decoupled** FastAPI + React stack on AWS EC2, added session login, parallel processing and horizontal scaling - adopted portfolio-wide.

AI-Driven Ab Initio → SQL/PySpark Converter (AWS Bedrock)

- ▶ Built end-to-end AI tool **achieving >95% ETL conversion** accuracy, dramatically accelerating legacy migration at scale, presented to senior stakeholders and got it approved for **production** use for all the colleagues across the portfolio.

TECH STACK

AWS: Glue · Lambda · S3 · Lake Formation · Step Functions · DynamoDB · EC2 · Sagemaker · Bedrock

Data Tools: DBT · Airflow · Databricks · PySpark · TWS · Hadoop · Teradata · Ab-initio ·

Languages: Python · SQL · PySpark · Shell · TypeScript · C++

Practices: Data modelling · Incremental loading · Data quality · IaC · CI/CD · Cost optimisation

ACHIEVEMENTS

- ▶ **Barclays 1-Year Milestone Award** - Recognised for exceptional contributions across data modernisation
- ▶ 600+ DSA challenges on LeetCode & GeeksforGeeks · Barclays GenAI Hackathons 2024 & 2025
- ▶ Passed Barclays LEVEL0 & LEVEL1 Functional Excellence (Financial Markets & Bookkeeping)
