Work Experience

Barclays Technology Centre India, Pune

Mar 2025 – Present

Senior Software Engineer – BA4

On-Site

- Led the design and optimization of **cloud-native data pipelines on AWS** for the Credit Risk Data Warehouse, processing **millions of records daily** to support regulatory and portfolio risk reporting.
- Designed and implemented **multiple GitLab CI/CD pipelines**, automating **DBT deployments to S3**, application releases to **EC2**, and **AWS Lake Formation permission provisioning** across databases, tables, and data locations for IAM roles, reducing manual deployment and access setup effort by **80%** and significantly improving release turnaround time.
- Led **next-generation data platform experimentation** by delivering POCs using **Airflow, Databricks, and Iceberg**, influencing strategic architecture decisions for the wider risk organization.
- Drove **data modernization initiatives** using **DBT**, strengthening data quality, lineage, and trust across downstream risk analytics and reporting systems.
- Partnered with **CTO, platform, and governance teams** to evaluate tooling and guide enterprise-wide adoption aligned with long-term risk data strategy.

Barclays Technology Centre India, Pune

Jul 2023 – Mar 2025

Software Engineer – BA3

On-Site

- Built and maintained **complex DBT transformation models** on **AWS S3-based data lakes**, producing curated datasets for downstream risk analytics, scorecards, and management dashboards.
- Developed and productionised **Python and AWS Glue based automation scripts** with robust validation, date control, and static data loading logic, ensuring minimal human intervention.
- Automated daily **batch workflows** using **Tivoli Workload Scheduler (TWS)**, ensuring reliable execution of critical risk data pipelines with strict SLA adherence
- Worked closely with upstream and downstream teams to define and govern **data contracts**, improving data quality, lineage, and confidence in enterprise risk metrics.

Projects

CRDW – Teradata Exit (Credit Risk Data Warehouse)

- Delivered a large-scale **data modernization initiative** using **AWS and DBT**, enabling scalable and compliant enterprise risk data processing.
- Optimized DBT pipelines processing **100M+ records daily**, reducing execution time by **55%** (45 minutes to 20 minutes).
- Developed **complex SQL transformations** to generate Golden Source datasets powering downstream **risk models and analytics**.
- Automated ETL workflows using **AWS Glue and Lambda**, implementing date control, data cleansing, and optimized static data loads.
- Designed **GitLab CI/CD pipelines** enabling one-click AWS deployments, cutting deployment effort by **65–70%**.
- Orchestrated daily **batch processes using Tivoli Workload Scheduler (TWS)**, ensuring reliable scheduling and execution.

AI Driven Ab Initio to SQL/PySpark Conversion(Using AWS Bedrock)

- Built an end-to-end user interface and **AI-driven** project to convert **Ab Initio graphs** into equivalent **SQL and PySpark code**.
- Implemented intelligent parsing and transformation logic to map Ab Initio components, joins, and data flows into optimized executable code.
- Achieved more than **98% conversion accuracy**, significantly reducing manual rewrite effort and accelerating migration from legacy ETL tooling.
- Demonstrated the solution to senior stakeholders, highlighting its potential to streamline large-scale **ETL modernization** initiatives.

Technical Skills

Languages: Python, PySpark, Shell Scripting, SQL, C++, HTML, CSS, TypeScript, React

Cloud & Databases: Amazon Web Services (EC2, S3, Step Functions, Glue, Redshift, DynamoDB), PostgreSQL, MySQL

Technical Fundamentals: Data Modeling, Database Management Systems, Operating Systems, Linux, Data Structures

Tools & Frameworks: DBT (Data Build Tool), Databricks, Airflow, Tivoli Workload Scheduler (TWS), Flask, Kafka

DevOps & CI/CD: GitLab, Jenkins, GitHub, Bitbucket, Docker

Big Data & Storage: Hadoop, Teradata, S3-based data pipelines, ETL/ELT patterns, Snowflake

Education

Vishwakarma Institute of Technology, Pune	2019 – 2023
B.Tech in Computer Science & Engineering	8.69 / 10 CGPA
Govt. Boys' Higher Secondary School, Jammu and Kashmir	2017 – 2019
Higher Secondary Education	91%

Achievements and Certifications

- Three AWS certifications—**AWS Certified Cloud Practitioner**, **AWS Certified Developer - Associate**, and **AWS Certified AI Practitioner** , demonstrating comprehensive expertise in cloud infrastructure and AI applications.
- Acknowledged for exceptional contributions and performance during **Barclays' 1-Year Milestone Celebration**, reflecting consistent professional excellence.
- Completed over **600** complex data structures and algorithms challenges on **LeetCode** and **GeeksforGeeks**, solidifying advanced problem-solving and coding skills.
- Successfully passed **LEVEL0 and LEVEL1 Functional Excellence** exams at **Barclays**, deepening understanding of financial markets, bookkeeping, and corporate financial reporting.
- Participated in Barclays **GenAI Hackathons** in 2024 and 2025, proposing innovative AI-driven solutions.
